

Entry level wireless intruder alarm panel Simple to install, cost effective and reliable

i-on Compact kit

A starter-level security alarm kit that brings next-generation cloud capabilities to residential properties. The wireless intruder panel with built-in keypad, offers up to 20 radio zones and can be programmed, managed and serviced remotely by installers via Eaton SecureConnect™.

EATON-COMPACTKIT1 kit contains:

- 2 x Pet tolerant PIR (XCELRPT)
- 1 x Door contact (DET-RDC-W)
- 2 x Two-way keyfob (FOB-2W-4B)
- 1 x External sounder (SDR-REXT-G2-BL)

Built with cyber security in its DNA the i-on Compact is Eaton SecureConnect™ Cloud and App enabled.

Multiple communication options

Built-in Ethernet port and optional PSTN or GSM allow you to tailor installations to the properties needs.

Eaton SecureConnect[™] Cloud and App

Control and monitor your panels through the cloud 24/7 anytime anywhere across multiple locations. Provide you customers with a secure App for convenient control of their system ensuring peace of mind.

Visual Verification

Connect Eaton security cameras to the compact panel to provide an additional layer of security. Capturing images locally on SD card and view through App or email.

The i-on compact panel allows you to add up to 20 different detectors - Build a Scantronic system to suit your project

Control panels and devices

i-on Compact

A simple to install and easy to use 20 zone radio intruder panel featuring an integrated keypad.

- Single box solution reducing installation time
- Low profile design providing a discreet solution
- Class-leading Scantronic radio

Control panels and devices

Motion detectors for indoors or the perimeter

For a consistent look across the installation, the motion detectors share a common design. The range offers radio or wired, pet tolerant and dual technology options.

Proximity tags

Used to set and unset intruder system instead of using a pin number. Several can be used to one system, tags can be allocated to each user.

Internal and External cameras

IP cameras provide peace of mind to the user by verifying alarm events with full HD 1080P quality. In addition, the user can be emailed images as they happen.

Protection for doors and windows

Protect the main points of entry to the property, with a choice of colours to suit different door and window frames. Choose to detect either the opening of doors or windows or the vibration caused by forced entry.

Environmental sensors

An optical radio smoke detector with a built-in sounder to alert occupants in the event of a fire. Flood detectors that signal the presence of water. For use in basements or adjacent to washing machines.

Internal and External sounders

The wired and radio external sounders provide 100dB sound output and are available in 3 different colours. Designed to blend in, the internal sounder can be installed in areas out of earshot of the panel or keypads, so that users can still hear system sounds.

Control panels and devices

User mobile app

- Peace of mind at a glance
- Set, unset and part set alarm systems
- Real time notifications
- Verifies events by delivering images to smart devices

Installer Cloud

- Easy access from any internet browser
- Manage all your panels from anywhere
- Perform remote configuration and software updates
- Enable or disable end-user access

KEY-RAS

The KEY-RAS is designed to work with the i-on range control panels.

The keypad allows users to set and unset the system. The KEY-RAS, in two-way mode, will also provide entry, exit and alarm tones.

- Four LEDs show the setting status of partitions or levels
- "A, B, C, D and Unset" keys provide quick setting and unsetting of the system
- · A built in proximity tag detector
- Built in panic button enabled in programming
- Option of two-way mode, which works with SecureConnect enabled panels to provide audible feedback on setting and unsetting
- One-way mode for use with older i-on panels and expandable panels. This provides an arming station to set or unset
- Option of battery or external 12V power supply

Eaton SecureConnect[™] end-user app

Eaton SecureConnect[™] is a smart intruder solution offering property owners 24/7 control over their security system from anywhere in the world through a user-friendly mobile app available for iOS and Andriod operating systems.

- Real-time push notifications of system activity are sent directly to the end-users smart device alerting them to events whether home or away.
- Allows users to set or unset their system remotely and receive visual verification of events instantly.
- Eaton's securely encrypted app is equipped with facial and fingerprint recognition and has been rigorously tested and approved by Eaton's Cyber-Security Centre of Excellence.
- Available on Eaton's second generation Scantronic i-on burglar alarm panels - i-on Compact, i-on Style, i-on30R and i-on40H.

Eaton SecureConnect[™] installer cloud

Eaton SecureConnect[™] installer cloud is a smart security management system for residential and commercial buildings, enabling remote monitoring of the latest IP intruder alarm devices via a user-friendly interface. Thoroughly tested by Eaton's Cyber-Security Centre of Excellence and keeps installers in total control of their installations.

- Perform configuration diagnostics and software updates from anywhere in the world. Drastically reducing call-out time, allowing installers to achieve more in a day than ever before.
- From any web browser manage all of your connected panels across multiple customers.
- Partnerships with CSL and WebWay add an extra layer of security to the Eaton SecureConnect system by facilitating immediate and reliable transmission of data from the premises to an ARC in the event of an alarm being triggered.
- Available on Eaton's second generation Scantronic i-on burglar alarm panels - i-on Compact, i-on Style, i-on30R and i-on40H.

Wired and Wireless Detection xcel PIRs

Offers a common appearance throughout a hybrid installation

xcel series of detectors introduces a housing for wired and wireless standard and pet tolerant PIRs

Easily available batteries

xceIR and xceIRPT take two standard AA batteries available from any retailer

Fewer site visits to change batteries

Battery life increased to 40 months using standard AA batteries

Fit radio PIRs where you want to

Advanced design has led to 30% range improvement

Greater performance for improved security

Consistency of coverage considerably improved due to the new design of spherical lens, five layers of beams and dual element sensor

The xceIRPT responds twice as quickly as the previous radio PIRs whilst maintaining pet tolerance up to 25Kg

Carry one detector for all installations

Compatible with all current Scantronic and Menvier alarm panels with radio capability

SDR-xEXT External sounder

A capsule range of external sounders, in three colours, with options for radio, wired and decoy.

Designed for use with i-on and Menvier, new and legacy 868MHz systems. Wired variants also compatible with third-party control units

Engineer-friendly:

a self-supporting lid, built-in spirit-level and revolving fixing holes for ease of installation including on uneven surfaces

High-power comfort LEDs and LED strobes: provides reassurance for the user

Common enclosure for entire range:

impact-resistant polycarbonate construction in a choice of 3 colours: blue, amber and red

- Selectable between Self Contained Bell (SCB) or Self Actuated Bell (SAB) modes:
 - In SCB mode the sounder, in alarm condition, draws its power from its integral internal battery
 - In SAB mode the sounder is driven from the control panel
 - Low-volume maintenance mode
 - Self-supporting lid
 - Built-in spirit level
- Sound output 100 dB at 1 meter
- Low current consumption (35mA and 225mA in-alarm current)
- Lid and rear tamper detection
- Selectable cut-off timer
- Choice of siren tones
- Compliance: EN50131-4 Grade: Grade 2 (SDR-WEXT-G2 and SDR-REXT-G2), or Grade 3 (SDR-WEXT-G3), PD6662:2010, EN50131-4:2009

Keyfobs

The PD6662:2010 compliant two-way keyfob (FOB-2W-4B) and one-way keyfob (i-FB01) both enable the user to remotely unset/set the system.

The two-way keyfob provides feedback on system status and confirms that the system has been set upon exit whilst the two-way keyfob can be programmed to be used as a panic button.

Both are designed to fit comfortably in your pocket or on a key ring.

Compatible with all current Eaton security control panels.

- Long-life lithium battery
- Two-way keyfob provides system status
- Replaceable battery
- Enhanced transmission range (FOB-2W-4B)
- Configurable set/unset
- Learnt to user profile not radio zones
- Programmable output button which can be used to operate motorised gates.

Slimline shock sensor & door contact range

Wireless slimline detector range is used for detecting threats at perimeters and alerting system users. Keeping property, people and belongings safe.

With a choice of 3 different finishes and slimline housing, these detectors are consistent throughout the range and will suit all installations.

- DET-RS has a built-in accelerometer that can select either shock or movement detection.
- DET-RDC uses a magnet to detect the opening and closing of a door or window.
- DET-RSDC can offer a confirmed alarm from a sequential activation.

- Grade 2 radio products
- Slimline housing & 3 colour finishes
- Adjustable detection & flexible installation
- Easily available CR2 battery
- Independently certified to EN50131
